#### IC TYPE 3 / EXTENDED ATTACK HELPLIST

#### 1. Recognize situation / limitations:

- Incident Commander needs to create a sense of organization.
- Type 3 IC needs to be a dedicated Incident Commander.
- Utilize experience of other fire fighters on the fire.
- Assign the most qualified individuals to manage segments of the fire.

#### 2. Determine objectives and needs:

- Fire fighter and public safety is the highest priority.
- Establish a maximum allowable area MMA for the incident, and develop appropriate suppression strategies for the fire.
- Resource values: What's at risk? What are their values? What's adjacent to your fire and it's value? Special use areas, wildlife management areas, etc.
- Document what the priorities are on the incident from critical to minimum.

#### 3. Coordinate and recognize additional resource needs:

- Coordinate through CCIFC or the Zone Duty Officer to request additional resources, including overhead.
- Create a sense of organization and delegate tasks to the most qualified individuals on-scene.
   Order additional overhead as needed to assist in planning, logistics, and operations.

#### 4. Establish Appropriate ICS Structure- Delegate:

#### **Possible Overhead Positions**

- Operations: Directly supervise suppression efforts
- Logistics: Begin assessing logistical support needs such as food, water, fuel, sleeping arrangements, special needs, etc.
- Plans: to address the following incident planning needs
  - Develop a communications plan: Frequency mgmt. (command, tactical, A/G, air ops)
  - Establish formal check in and resource status with MIFC.
  - Gather, record and provide on-site information to firefighting personnel and dispatch
  - → Take on-site weather and obtain weather reports and forecasts
  - The Incident Organizer is the initial Incident Action Plan. Prepare maps
  - ◆ Assist in providing information for developing a Wildland Fire Situation Analysis
- Utilize local and regional people: Ask about local drivers for logistics. Inquire about meals at or from local establishments. A local camp manager is a usually a great help.

#### Other positions to consider

- → Finance, Time Keeper
- Helispot Manager
- ⇒ Situation Unit Leader
- **⇒** EMT/ Medical Unit Leader
- Strike Team Leader/ Task Force Leader
- Division Group Supervisors.
- Staging Area Manager
- Safety Officer

#### 5. Costs

Estimate daily and total costs. Record information on overall hours worked, number of retardant drops, and overall helicopter time on the incident.

#### One Day Order Amounts:

MRE's: 1 case of MREs for 4 people per day. 6 cases per day for (1) 20 person crew.

WATER: 3 gal/ person, (12) cubies per crew

FUEL: pumps (5 gal. 4 hrs) chainsaws (1 gal. Fuel/ 4 hrs)(1 gt. Oil/ 2 hrs)

Hose and appliances: order enough and be specific. 1 roll 1" for every 2 rolls 21/2"

Remember gated Y's, nozzles, hose clamps, reducers etc.

Batteries?Hot meals?

→ Toilet facilities?

Tollet lacilities?

**⇒** Garbage bags?

Tools?Flagging/ tape?

→ Fuel truck?

→ Medical Plan?

→ Misc. supplies

#### MEMORANDUM May 10, 2005

To: Type 3, 4 and 5 Incident Commanders
From: Moab Interagency Fire Management Board

Subject: Expectations and Responsibilities for Type 3, 4, and 5 Incident

Commanders

We would like to convey to all Type 3, 4 and 5 Incident Commanders our expectations about our responsibilities on incident management in the Moab Interagency Fire Management Area. As an IC, you must keep firefighter and public safety as your highest priority on every fire.

The following list of expectations and responsibilities will help each of you in that task.

- Develop and implement viable strategies and tactics for the incident.
- Monitor effectiveness of the planned strategy and tactics.
- Disengage suppression activities immediately if strategies and tactics cannot be implemented safely.
- Maintain command and control of the incident.
- This booklet will be completed on all Type 3, 4 and 5 Forest Service incidents.
- This booklet will be completed on all Type 3 and 4 BLM incidents.
- Implement the Risk Management Process, as outlined in the Incident Response Pocket Guide.
- Assure Work Rest Guidelines are followed.

We have the utmost respect for your knowledge and professionalism. You serve an extremely important leadership role. Please understand that your actions will be supported in any cases where you take appropriate precautions to safeguard firefighters and the public.

# **QUESTIONS AND ANSWERS-AAR CONT. Page 16 IRPG** 1. What was planned? Review the primary objectives and expected action plan. 2. What actually happened? Review the days actions 2-1. Identify and discuss effective and non-effective performance. 2-2. Identify barriers that were encountered and how they were handled. 2-3. Discuss actions that weren't standard operation procedures, or those that presented safety problems 3. Why did it happen? Discuss the reasons for ineffective or unsafe performance. Concentrate on what not who! 4. What can we do next time? Determine lessons learned and how to apply them in the future.

**AFTER ACTION REVIEW** INCIDENT NAME: Resource: DATE: IC Type: CRITIQUED BY: (add names) The purpose of this After Action Review is to evaluate decisions, actions and how well they worked. Were they within the Standard Operating Procedure and the rules? Pay particular attention to how the 10 SFO, Mitigation of the 18 Watch Out Situations and LCES were applied. Comment where applicable. INCIDENT OBJECTIVES									
1. SAFETY of firefighters and public.									
2.									
3.									
4.									
Your goal is to manage the incident and not create another.									

(Examples: protect structures, keep fire to east of road, river or ridge)

RESOURCE SUMMARY											
RESOURCES ORDERED	RESOURCE ID	DATE/ ETA	AT SCENE	BRIEFED YES/NO	LOCATION/ ASSIGNMENT	RELEA Date /	ASED Time				

INCIDENT COMPLEXITY ANALYSIS (Type 3, 4, 5)		
· · · · · ·	1	
Fire Behavior	Yes	No
Fuels extremely dry and susceptible to long-range spotting or you are currently experiencing extreme fire behavior.		
Weather forecast indicating no significant relief or worsening conditions.		
Current or predicted fire behavior dictates indirect control strategy with large amounts of fuel within planned perimeter.		
Firefighter Safety		
Performance of firefighting resources affected by cumulative fatigue.		
Overhead overextended mentally and/or physically.		
Communication ineffective with tactical resources or dispatch.		
Organization		
Operations are at the limit of span of control.		
Incident action plans, briefings, etc. missing or poorly prepared.		
Variety of specialized operations, support personnel or equipment.		
Unable to properly staff air operations.		
Limited local resources available for initial attack.		
Heavy commitment of local resources to logistical support.		
Existing forces worked 24 hours without success.		
Resources unfamiliar with local conditions and tactics.		
Values to be Protected		
Urban interface; structures, developments, recreational facilities, or potential for evacuation.		
Fire burning or threatening more than one jurisdiction and potential for unified command with different or conflicting management objectives.		
Unique natural resources, special-designation areas, critical municipal watershed, T&E species habitat, cultural value sites.		
Sensitive political concerns, media involvement, or controversial fire policy.		

If you have checked "Yes" on 3 to 5 of the analysis boxes, consider requesting the next level of incident management support.

<u>Type 5 Characteristics</u>: (a) C&G Staff positions are not activated. (b) Resources vary from one to five firefighters. (c) Incident is normally contained rapidly during IA. (d) A written action plan is not required.

<u>Type 4 Characteristics</u>: (a) C&G Staff positions are not activated. (b) Resources vary from single Firefighter to several single resources or a single Task Force or Strike Team. (c) The incident is limited to one operational period in the control phase. Mop-up may extend into multiple periods. (d) A written plan is not required.

<u>Type 3 Characteristics</u>: (a) Some of the C&G Staff may be activated, as well as DIVS/GROP Supervisor and Unit leaders. (b) Resources vary form several single resources to several TFL's/STL's. (c) Incident may be separated into several divisions, but usually does not meet the DIVS/GROP Supervisor position for span or control. (d) May involve several burning periods prior to control, which requires a written action plan.

#### **RISK MANAGEMENT**

Maintain your situational awareness. Ensure compliance with the 10 Standard Firefighting Orders and LCES. Continually monitor the 18 Situations and apply appropriate mitigation. As the incident progresses, continually re-evaluate your situation. When hazards are identified mitigate them or change tactics and or strategy.

Refer to the green pages in the IRPG.

	rtoror to and ground pages in and in the Gr

#### **WORK REST RATIO DOCUMENTATION WORKSHEET**

This worksheet is designed to help the IC document and calculate amount of rest required to meet the Work/Rest guidelines.

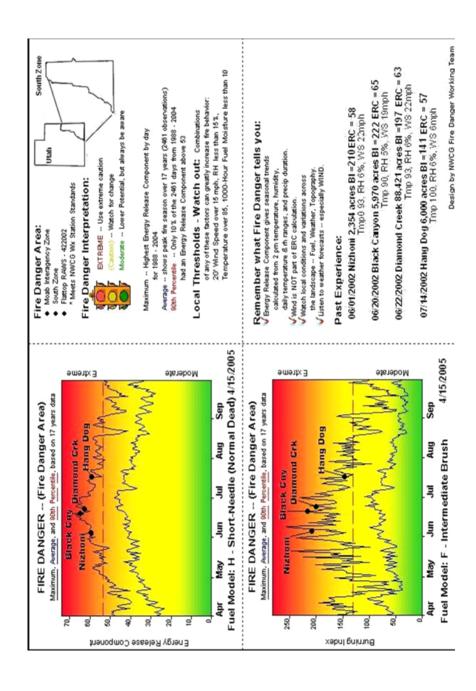

- For every 2 hours of work or travel provide 1 hour of sleep or rest.
- IC must justify and document work shifts exceeding 16 hours and those that do not meet the 2:1 work/rest guidelines -- see below.

Date	Operational Period Start Time	Operational Period Stop Time	Total Hours Worked	Rest Time (document hours when employee or module rested)						
Approving lengths hrs giv	val for shift s exceeding 16 en by:	Date/ Time Approval Given:

#### **10 STANDARD FIRE ORDERS**

- 1. Keep informed on fire weather conditions and forecasts.
- 2. Know what your fire is doing at all times.
- 3. Base all actions on current and expected behavior of the fire.
- 4. Identify escape routes and safety zones, and make them known.
- 5. Post lookouts when there is possible danger.
- 6. Be alert. Keep calm. Think clearly. Act decisively.
- 7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
- 8. Give clear instructions and insure they are understood.
- 9. Maintain control of your forces at all times.
- 10. Fight fire aggressively, having provided for safety first.

## The 10 Standard Fire Orders are firm. We Don't Break Them; We Don't Bend Them.

All firefighters have a Right to a Safe Assignment.

#### **18 WATCHOUT SITUATIONS**

- 1. Fire not scouted and sized up.
- 2. In country not seen in daylight.
- 3. Safety zones and escape routes not identified.
- 4. Unfamiliar with weather and local factors influencing fire behavior
- 5. Uninformed on strategy, tactics, and hazards.
- 6. Instructions and assignments not clear.
- 7. No communication link with crew members/supervisors.
- 8. Constructing fireline without safe anchor point.
- 9. Building fireline downhill with fire below.
- 10. Attempting frontal assault on fire.
- 11. Unburned fuel between you and the fire.
- 12. Cannot see main fire, not in contact with anyone who can.
- 13. On a hillside where rolling material can ignite fuel below.
- 14. Weather gets hotter and drier.
- 15. Wind increases and/or changes direction.
- 16. Getting frequent spot fires across line.
- 17. Terrain and fuels make escape to safety zones difficult.
- 18. Taking a nap near the fireline.
